

## SEATON HIGH SCHOOL EMERGING TECHNOLOGIES SPECIALIST PROGRAM 2020

**Applications are now open for the Year 8 Seaton High School Emerging Technologies Specialist Program in 2020.**

Students will have the opportunity to engage in a range of creative applications of emerging technologies such as Robotics, Computer Aided Design, advanced manufacturing and resin 3D printing. Students will tackle real world challenges framed around conservation and applied geospatial science using UAV technology and industry standard 3D mapping software PIX 4D. Seaton High School integrates design, innovation and entrepreneurship to create a learning environment that focuses on problem solving and critical and creative thinking to empower students with the key skills imperative for jobs of the future.

**Applications can be downloaded from**

**[www.seatonhs.sa.edu.au](http://www.seatonhs.sa.edu.au)**

**Please Submit all applications to Livia Conserva,  
Front Office Seaton High School.**

Applications Close Friday 26th October 2018

### **Developing Skills In...**

**Critical and Creative Thinking**

**Collaboration and Project Management**

**Innovation and Entrepreneurship**

### **Through a Focus on...**

**Remote Sensing and Applied Geospatial Science**

**CAD, Advanced Manufacturing and Business Enterprise**

**Robotics**

**Sustainability and Automated Systems for Farms of the Future**
